

AI GOVERNANCE FOR BUSINESS LEADERS

Implement ISO/IEC 42001 and
Responsible AI Without Becoming
an AI Expert

Artificial intelligence is transforming every industry.
With innovation comes responsibility.

This course gives leaders the confidence and
practical framework to govern AI safely, ethically,
and in alignment with global standards.

WHO THIS COURSE IS FOR

- Executives
- Managers
- AI project owners
- Compliance officers
- IT leaders

WHAT YOU WILL GAIN

UNDERSTAND AI WITH CONFIDENCE

Build a solid foundation
in modern AI
technologies and
business applications.

MANAGE RISK EFFECTIVELY

Identify and assess the
key risks AI introduces
to your organization.

APPLY GLOBAL STANDARDS

Implement ISO/IEC 42001
and leading frameworks
with practical guidance.

ESTABLISH CLEAR POLICIES

Create policies and
acceptable use rules
that promote responsible
AI adoption.

DRIVE RESPONSIBLE INNOVATION

Build a governance
program that supports
innovation while
protecting your people,
data, and reputation.

COURSE HIGHLIGHTS

- ✓ Executive-level content with real-world examples
- ✓ Practical frameworks you can apply immediately
- ✓ Aligned to ISO/IEC 42001, NIST AI RMF, and global best practices
- ✓ Focus on governance, risk, compliance, and ethical AI
- ✓ Designed to help organizations build trust and stay ahead of AI regulation

PERFECT FOR ORGANIZATIONS THAT

- ✓ Are adopting AI tools and platforms
- ✓ Need to meet regulatory expectations
- ✓ Want to reduce risk and improve AI decision-making
- ✓ Aim to build trust with customers, partners, and stakeholders

LEAD AI. GOVERN WITH PURPOSE.
Build a responsible AI future starting today.
